These studies suggest that genetic factors underlie about 50 percent of the difference in

Get Free 50 Genetics Ideas You Really Need To Know: 50 Ideas You Really Need To Know Series

intelligence among individuals. Other studies have examined variations across the entire genomes of many people (an approach called genome-wide association studies or GWAS) to determine whether any specific areas of the genome are associated with IQ.

Is intelligence determined by genetics?:

Chromosomes and
Genes

**Rabbit Genetics -
DebMark**

Genetic inheritance
follows rules. Genes
are real things. All cells

Get Free 50 Genetics Ideas You Really Need To Know Series

arise from pre-existing cells. Sex cells have one set of chromosomes; body cells have two. Specialized chromosomes determine gender. Chromosomes carry genes. Genes get shuffled when chromosomes exchange pieces. Evolution begins with the inheritance of gene variations.
