TSDE (your profit) So,

when we say that a business was sold for a multiple of 2.44X, for example, it means that the amount paid for the business is a value of 2.44 times the profit. For example, a business that is doing \$300,000 in profit per year sold for at 2.44X would have a sale price of \$732,000 ($\$300,000 * 2.44 = \$732,000$).

Amazon.com: For What It's Worth: Business Wisdom from a ...

Basically, there are two major ways to figure the price of a small business. One is the company's ability to

Get Free For What Its Worth

Business Wisdom

generate sales, cash flow and/or profits. The second method is to value the company based on its assets.

Which method is used depends on the condition of the business and the industry it is in.

How much is my business worth? Business valuation

A business valuation calculator helps buyers and sellers determine a

Get Free For What Its Worth

rough estimate of a

business's value. Two

of the most common

business valuation

formulas begin with

either annual sales or

annual profits (also

known as seller

discretionary

earnings), multiplied

by an industry

multiple. Both methods

are great starting

points to accurately

value your business.

For What It's Worth | Contractors Financial Opportunity, LLC

A fair way to value
your business is to take
your net income (after
you deduct a fair salary
for yourself if you work
in the business), add
back in any personal
expenses the business
picks up for you and
multiply that by a

The standard approach

Get Free For What Its Worth

Business Wisdom

to finding the value of a business is to take a multiple of the annual EBITDA (earnings before interest, taxes, depreciation and amortization). As a general rule, a multiple of 3-4 is considered reasonable for small and medium sized businesses. Example: EBITDA = \$100,000; value (EBITDA X 3) = \$300,000.
