There are items in the DME catalog that do not have part numbers called out in the catalog, when ordering on-line what are some of the basic rules?

Miscellaneous Frequently Asked Questions - DME

Purging compound, specifically commercial purging compound, is a product formulated specifically to clean thermoplastics molding machines and extruders. It typically contains a base resin, and other additives intended to clean the screw, barrel, and extruder die.

What is Purging Compound : Plastics Technology

The flexibility of Fresh Start Purging Compounds allows users to replace a number of formulas/grades typically used for a specific application. This feature could reduce inventory, purchasing costs, and accidental misuse. Unlike other purging compounds, Fresh Start requires zero soak time for the chemical reactions to take place. Other purging formula brands require the temp to be raised to get the best performance out of the purge.
