is the second course in the two-course methods/statistics sequence. Students enrolled in this course must have taken Soc 2155 and earned a grade of at least "C." This course reviews and extends student knowledge of the statistics commonly used in sociology and criminology research.

Quantitative Research Methods and Analysis Syllabus

Quantitative Techniques – I Notes 5. Statistics are collected in a systematic manner and for a predetermined purpose: In order that the results obtained from statistics are free from errors, it is necessary that these should be collected in a systematic manner. Haphazardly collected figures are not desirable as they may lead to wrong conclusions.

QUANTITATIVE TECHNIQUES FOR BUSINESS

Using Both Types of Data. While quantitative data is easier to analyze, qualitative data is also important. If you are conducting an experiment using the scientific method, for example, you want to record your observations and data as thoroughly as possible. Let's say you want to describe a cat. You would use both types of data.
