Semantic Web for the Working Ontologist (2nd ed.)

The ultimate goal of the Web of data is to enable computers to do more useful work and to develop systems that can support trusted interactions over the network. The term “Semantic Web” refers to W3C’s vision of the Web of linked data. Semantic Web technologies enable people to create data stores on the Web, ...

Chapter 7. RDFS-Plus - Semantic Web for the Working ...

the Semantic Web into the hands of a generation of intelligent practitioners who could build real applications. For this reason, we concentrated on a particular essential skill for constructing the Semantic Web: building useful and reusable models in the World Wide Web setting. Even within the realm of modeling, our early hope was to have something

Working for Us - Semantic Web Company

The Semantic Web is the application of advanced technologies that have been used in the context of artificial intelligence, expert systems, and business rules execution in the context of a World Wide Web of information. The Semantic Web is not simply an application running on the Web somewhere; it is a part of the very infrastructure of the Web.

...

One of the long-term goals of the Semantic Web is to allow agents, software applications and web applications to access and use metadata. A key tool for doing this is simple protocol and RDF Query Language (SPARQL), which is still in development. SPARQL's purpose is to extract information from RDF graphs.
