To initiate a SCO connection to a remote device, profile drivers should build and send a BRB_SCO_OPEN_CHANNEL request. If the remote device accepts the profile driver's SCO connection request, the profile driver can then perform additional BRB commands across the newly connected channel by using IOCTL_INTERNAL_BTH_SUBMIT_BRB, including: BRB_SCO ...

Creating a SCO Client Connection to a Remote Device ...

Writing a device driver can be pretty simple, or it can be almost arbitrarily complicated. For instance, I've been involved in a project where it took six of us almost three years to solve ONE bug in a device driver. Of course, we cleared out dozens of other bugs while looking for it... the code improved immensely.
